OFFERING OEM

(Original Equipment Manufacturer)

It's the perfect solution for customers seeking ready-made, direct-to-market products. This offer allows companies to select the ideal models from our extensive product range. With a variety of sizes, shapes, colors, styles, and functional features, there's something to suit every need.

Phases of OEM cooperation:

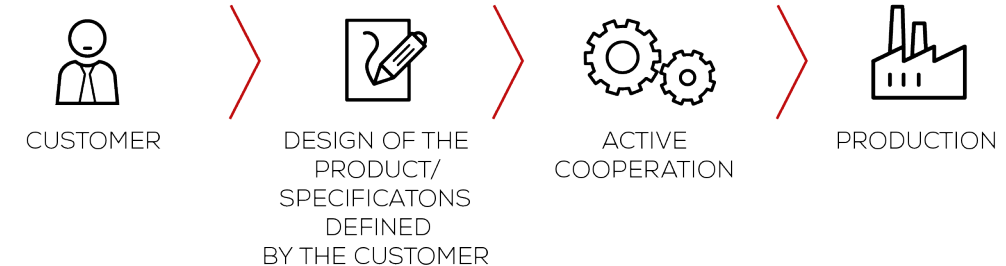

OFFERING ODM

(Original Design Manufacturer)

We also offer a comprehensive collaboration model for customers looking to implement their own sink designs. We guarantee confidentiality and complete data security throughout the process. Our support extends to every stage of cooperation: analyzing designs, finding the best construction solutions based on our experience, consulting, and managing the production stage. The entire process is handled in-house, from mold creation to final product production and delivery.

Phases of ODM cooperation:

AXIS process

At AXIS, we take a professional and thorough approach to creating sinks and washbasins.

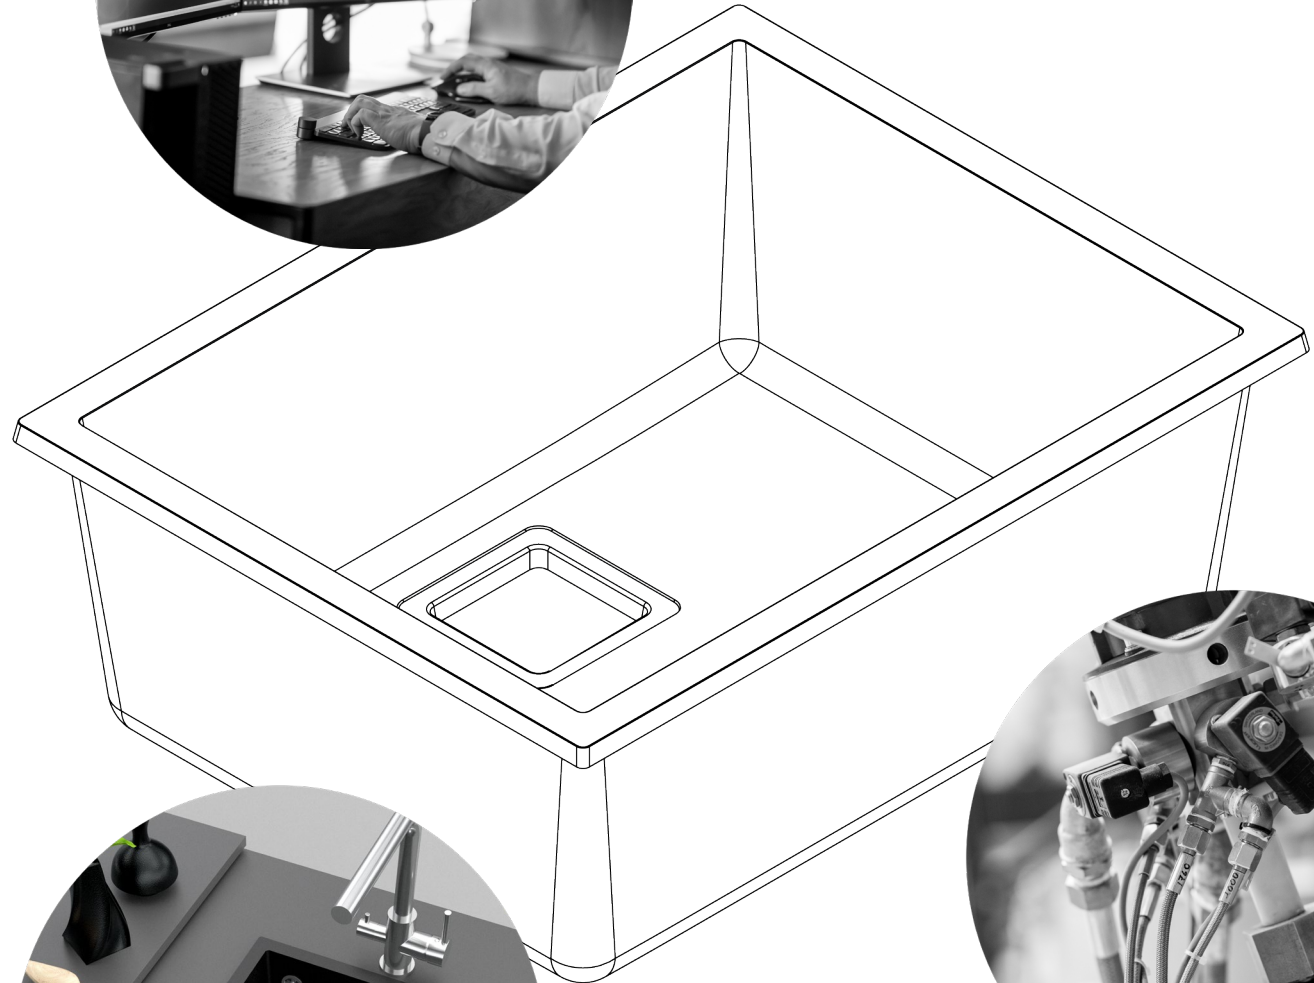

Every step—from design and prototyping to tool preparation and production—happens in-house, ensuring a high-quality final product.

Our production line is the core of our business. We blend advanced technology with top-quality materials backed by multi-stage quality control. The result is AXIS products that are known for their durability, aesthetics, and reliability.

All-in-one planning and execution.

AXIS delivers it all:

From Stone To Style

Careful selection of raw materials is key to the consistent quality of AXIS sinks. These exceptional products are crafted from a blend of German quartz and certified resin—essential ingredients that ensure their remarkable durability and resistance to damage. The precisely chosen European quartz, known for its unmatched quality, combined with premium resin, guarantees the superior properties of AXIGRAN. This commitment to sourcing the finest materials is our promise that AXIS sinks will meet the expectations of even the most demanding users, maintaining consistent quality for years to come.

RESISTANCES

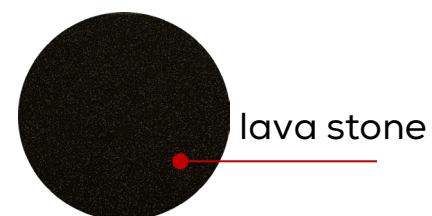

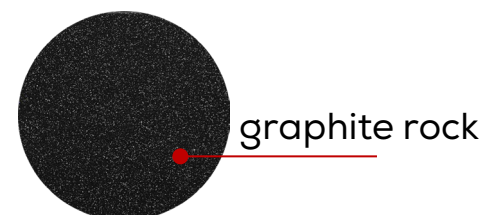

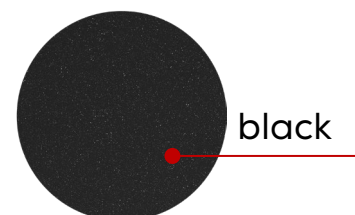

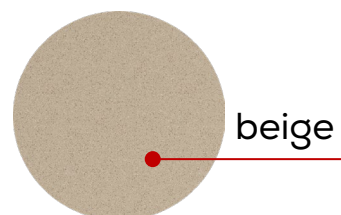

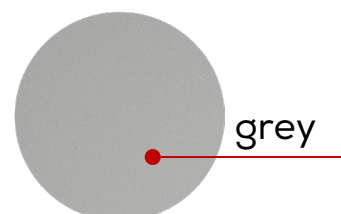

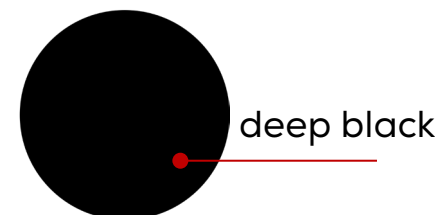

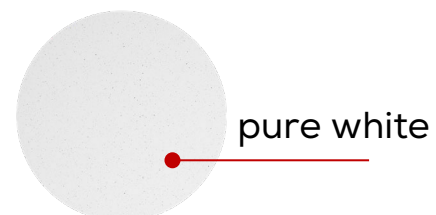

axi-gran

colour palette

AXIS products are inspired by the beauty of nature, offering a timeless color palette with exceptional durability. The mineral-based pigments used in the coloring process make the colors resistant to sunlight, preserving their vibrancy for years. Mass dyeing technology embeds the color throughout the material, ensuring a consistent appearance across the entire product. Our selection of twelve shades is carefully curated to harmonize with various styles, adding class and elegance to any interior.

FLEXIBLE PACKAGING METHOD

Depending on your needs, we have three packaging methods such as cardboard, ecommerce, standard or premium packaging.
Depending on the number of orders, the printing of the packaging can be changed.

1. CARDBOARD

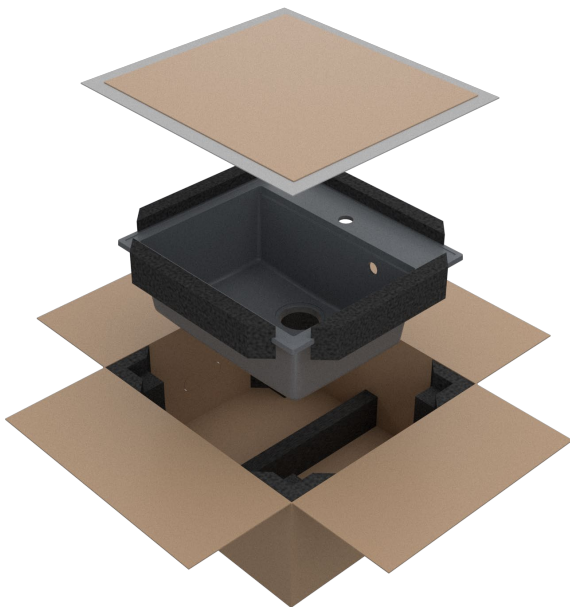

Cardboard packaging method.
Reduced amount of cardboard used, lighter packaging.

More sinks on one pallet.
Up to 34 pc!

2. ECOMMERCE

Ecommerce packaging method.
The sinks are hung on foam corners and covered with a lid.

Safe transport

3. STANDARD

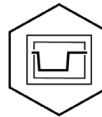

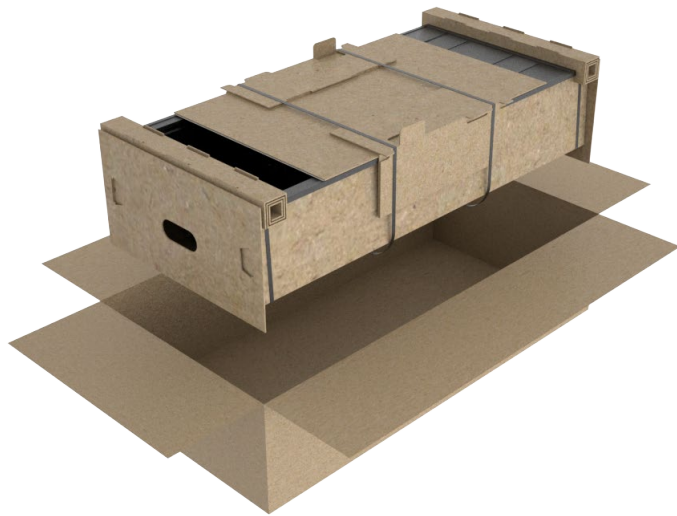

Standard packaging method.
The sinks are hung on cardboard insert and covered with a lid.

Safe transport

4. PREMIUM „HANGING”

Premium packaging method „hanging”.
Sinks are hung on a special cardboard construction inside the cartons.

Safe transport

Washbasins

The comprehensive AXIS washbasin range includes models with three mounting options.

The minimalist design, paired with the wide color range of AXIGRAN material, seamlessly fits into various bathroom styles. With high-quality craftsmanship and modern technological solutions, AXIS washbasins deliver both aesthetics and functionality.

Accessories

We offer a wide range of kitchen accessories that perfectly complement our sinks. Our thoughtfully selected accessories complete any kitchen setup, from cutting boards and faucets to siphons and soap dispensers.

Professional Care & Cleaning Agents

Granite sinks can develop various stains during everyday use, such as limescale and water spots. We recommend wiping the sink's surface after each use, which helps prevent water from drying and reduces scale buildup. This simple step makes subsequent cleaning and maintenance much easier. AXIS also offers professional cleaning products specifically designed to care for and preserve both natural and artificial granite surfaces.
